Goldstein, L.J.

OlympiaStat. Spreadsheet statistical analysis package. Version 1.0.

Wiley, New York, NY (ISBN 0-471-57967-X). 2 3,5" diskettes. (1994).

OLYMPIASTAT is a statistical analysis program designed for students in courses on computerized data analysis. Based on a familiar spreadsheet format, OLYMPIASTAT allows students to easily enter store, modify, and experiment with data, using the following statistical procedures: descriptive statistics, hypothesis testing, regression analysis, analysis of variance, time series analysis, Built-in Graphics allow spreadsheet data display in a wide variety of common formats. Graphs may be edited, stored, and printed. Built-in Distributions and random number generation features allow the students to conduct experiments with random data.
