

ZMATH 1995a.00459

Schattschneider, D.

Escher's metaphors.

Sci. Am. 271, No. 5, 48-53 (1994).

M. C. Escher's impossible staircases and complex mosaics are more than a treat for the eyes. Although the artist claimed to be naive about formal mathematics, his drawings reveal a keen instinctive grasp of infinity, symmetry and other principles. (orig.)

Classification: M80
