

ZMATH 2014d.00802

Shaughnessy, J. Michael

Commentary on the chapters on probability from a stochastic perspective.

Chernoff, Egan J. (ed.) et al., Probabilistic thinking. Presenting plural perspectives. Dordrecht: Springer (ISBN 978-94-007-7154-3/hbk; 978-94-007-7155-0/ebook). Advances in Mathematics Education, 481-489 (2014).

Summary: The predominant probability perspective of authors in this section of the book arises from the oft ill-defined constructs “stochastic” and “random.” The four chapters all rely on the meanings of these two terms from various points of view and for various purposes.

Classification: K50 K40 D20

Keywords: probability; stochastics
