**The use of original sources and its possible relation to the recruitment problem.**

Ubuz, Behiye (ed.) et al., CERME 8. Proceedings of the eighth congress of the European Society of Research in Mathematics Education, Antalya, Turkey, February 6–10, 2013. Ankara: Middle East Technical University (ISBN 978-975-429-315-9). 1990-1999 (2013).

Summary: Based on a study about using original texts with Danish upper secondary students, the paper addresses the possible outcome of such an approach in regard to the so-called recruitment problem to the mathematical sciences. 24 students were exposed to questionnaire questions and 16 of these to follow-up interviews, which form the basis for both a small quantitative analysis and a qualitative elaboration of this.
