

ZMATH 2016e.00370

Young, Andrea; Bruhns, Kathryn

Chalk it up to experience: using chalkboard paint to create mathematical manipulatives.

Int. J. Math. Educ. Sci. Technol. 47, No. 6, 961-971 (2016).

Summary: In this article, we give two examples of creating portable chalkboards using chalkboard paint for students to use during cooperative learning. This provides a creative method for professors to facilitate active learning in the undergraduate mathematics classroom.

Classification: D40 G90 I20

Keywords: active learning; chalkboard paint; spherical geometry; calculus
