Hoehn, Larry

Derivation of the law of cosines via the incircle.

Forum Geom. 13, 133-134 (2013).

In this article the authors derive the famous law of cosines without using special cases and without using the Pythagorean theorem deriving a formula by equating independent expressions for the radius r of the incircle of the given triangle.

Francisco Vittone (Rosario)

Classification: G60

Keywords: law of cosines
