Research on mathematics learning at the “Center of Individual Development and Adaptive Education” (IDeA) – an introduction.

Summary: In 2008, the research center Individual Development and Adaptive Education was constituted by the Goethe University, the German Institute for International Educational Research, and the Sigmund Freud Institute, all located in Frankfurt am Main, Germany (http://www.idea-frankfurt.eu/). The research of the center focuses on the development of children in preschool, kindergarten, and primary school age by including and combining cognitive, neuro-cognitive and socio-emotional factors.
