Griffiths, Martin; Griffiths, Jonny

A pair of Fibonacci-like polynomials arising from a special mapping.

Int. J. Math. Educ. Sci. Technol. 47, No. 2, 291-298 (2016).

Summary: We study here a pair of sequences of polynomials that arise from a particular iterated mapping on the plane. We show how these sequences come about, and give some of their interesting mathematical properties.

Classification: F65 H35

Keywords: iterated map; mapping on the plane; sequence of polynomials
