Melser, Nancy Armstrong; Leitze, Annette Ricks
Connecting Language Arts and Mathematical Problem Solving in the Middle Grades.
Middle Sch. J. 31, No. 1, 48-54 (1999).

Discusses the use of children’s literature to integrate language arts and mathematical problem solving in the middle school classroom. Considers selecting a book and writing the language arts and problem solving lessons; describes the process of creating and solving a mathematical problem based on a story. (ERIC)
