Riley, Richard W.
In Math and College-Going, Middle School Makes All the Difference.
Middle Sch. J. 29, No. 2, 3-7 (1997).

Discusses the role of middle school education for providing students with a strong foundation in mathematics and preparing them for college. Considers research studies, such as the Third International Mathematics and Science Study and the National Education Longitudinal Study, which demonstrate the connection between middle schools and college and mathematics achievement.
