Patrick, Rachel

Not Your Usual Maths Course: Critical Mathematics Education for Adults.

High. Educ. Res. Dev. 18, No. 1, 85-98 (1999).

An action research project investigated the features of critical theory that were useful for teaching everyday mathematics in an evening course for five Australian adults. The development of a positive, cooperative learning environment, as discussed by M. Frankenstein (1989) and O. Skovsmose (1994) proved to be key in increasing mathematical confidence and ungrading skills. (ERIC)

Classification: B60
