McDonald, Jacqueline

Graphs and Prediction: Helping Children Connect Mathematics and Literature.

Read. Teach. 53, No. 1, 25-29 (1999).

Describes class activities that combine reading-prediction strategies with various graphs that quantify and make visual representations of those predictions, strengthening both reading and mathematical knowledge. Describes learning about whole numbers (picto/bar graphs), multiples (bar graphs), fractions (pie graphs), and percents (pie graphs). (ERIC)

Classification: K40
