

ZMATH 2014b.00521

Bölcskei, Attila; Szoboszlai, Mihály

Secondary school geometry from the perspective of engineering education and talent management. (A középiskolai geometriaoktatásról a mérnökképzés és a tehetséggondozás szemüvegén keresztül.)

Mat. Tan. 20, No. 2, 36-38 (2012).

The authors emphasize the importance of spatial geometry. They advise secondary school teachers, how they should expand the secondary school curriculum. The authors show the biggest mistakes which are made by first-year university students in geometric constructions. *Katalin Munkácsy (Budapest)*
