Development of Theme-based, Interdisciplinary, Integrated Curriculum: A Theoretical Model.

Sch. Sci. Math. 98, No. 6, 312-19 (1998).

Presents a model for developing theme-based, interdisciplinary, integrated curriculum. Model includes a theme-creation phase and an activity-refinement phase. The integrated continuum model is intended to be used by curriculum developers to facilitate the creation of powerful interdisciplinary lessons. (ERIC)

Classification: D33

Keywords: integrated curriculum; science education; thematic approach
