

ZMATH 1998d.02974

Missen, Ronald W.; Smith, William R.

Using Mathematica and Maple To Obtain Chemical Equations.

J. Chem. Educ. 74, No. 11, 1369-71 (1997).

Shows how the computer software programs Mathematica and Maple can be used to obtain chemical equations to represent the stoichiometry of a reacting system. Specific examples are included. Contains 10 references. (ERIC)

Classification: M64
