**What's DUE: Engineering On-Ramps to the Information Superhighway.**

Comput. Appl. Eng. Educ. 5, No. 4, 277-80 (1997).

The National Science Foundation's Directorate for Education and Human Resources (NSF/EHR) provides leadership for improving the quality of science, mathematics, engineering, and technology education, kindergarten through graduate school. This article examines NSF and Division of Undergraduate Education (DUE) projects promoting the use of technology in undergraduate education: access to information technology, cross-disciplinary collaboration, and enhanced undergraduate learning.
