Durost, Richard A.

Single Sex Math Classes: What and for Whom? One School's Experiences.

NASSP Bull. 80, No. 577, 27-31 (1996).

Presque Isle (Maine) High School has offered a section of all-girls algebra for seven years. The intent was to narrow the gap between 11th-grade boys' and girls' math achievement scores and create a more comfortable learning atmosphere for girls. The achievement score gap has decreased from 72 to 16 points. (ERIC)
