Piel, John A.

Computer Applications and Manipulative Mathematics Program (CAMMP): Connecting NCTM Standards to Teacher Practice.

J. Technol. Teach. Educ. 2, No. 3, 281-92 (1994).

Describes a summer mathematics institute designed for the professional development of practicing elementary teachers who need to implement NCTM (National Council of Teachers of Mathematics) standards in mathematics education. Highlights include task analysis, manipulated mathematics, computer transition activities, curriculum-based assessment, and module production and distribution. (ERIC)
