

ZMATH 2013d.00054

Druzhinin, B. L.

The law is the law. (Zakon est' zakon.)

Mat. Shk., No. 3, 34-38 (2012).

Alfred Nobel had offended mathematicians by denying them the most prestigious scientific awards in his own name. No science can do without mathematics, especially physics. The author offers to watch the role played by mathematics in the opening of one of the most famous laws of physics – the law of gravity.
