

ZMATH 2013a.00886

Winkel, Brian

Thinking outside the box ... inside the box.

Int. J. Math. Educ. Sci. Technol. 43, No. 5, 663-668 (2012).

Summary: We consider an oblique approach to cutting regions out of a flat rectangular sheet and folding to make a maximum volume container. We compare our approach to the traditional approach of cutting out squares at each vertex of the sheet.

Classification: N64 I44

Keywords: calculus; optimization; box volume; oblique approach
