**Teaching a blind schoolgirl – my experience. (Moja izkušnja poučevanja slepe učenke.)**

Mat. Šoli 18, No. 3-4, 45-49 (2012).

Summary: The article describes how I was confronted with the task of teaching a blind schoolgirl as a teacher of mathematics in the third triennium of primary school. Blind pupils are growing in numbers in regular primary school. In the beginning I had a lot of trouble because I couldn't find literature which would describe the specifics of my subject. I wish that my article could offer some help to all those who will be confronted with the task to teach blind and weak-sighted children in regular school.
