Mathematical modeling in primary school. (Matematičko modelovanje u osnovnoj školi.)

IMO, Istraz. Mat. Obraz. 4, No. 6, 25-29 (2012).

Summary: In this seminary we will expose specificity of mathematics modelling in primary school. Before that we will, of course, talk about concept of modelling and his complexity. Basic questions on which this work is based are: "What is mathematical modelling?, Applying models?, How to understand mathematical modelling?, Mathematical modelling in primary school?" During the work on this seminary, we align on opinion of other authors who also were in this problem and gave their contribution on the research of mathematical modelling.

Classification: D40 M10

Keywords: mathematical modelling; primary school
