Zlokapa, Bojana

Mathematical modeling in education – problems and advantages. (Matematičko modelovanje u obrazovanju – problemi i prednosti.)

MAT-KOL (Banja Luka) 18, No. 1, 33-42 (2012).

Summary: One goal of mathematics education is to educate pupils to become responsible citizens. Important for this is the achievement of modelling competence of students at school. I want to identify chances and obstacles which can promote the development of these competences, but can also obstruct them drastically.

Classification: D40 M10

Keywords: mathematical modelling; instruction
