Boričić, Branislav

Diagrams in teaching logic and set theory. (Dijagrami u nastavi logike i teorije skupova.)

Nast. Mat. 56, No. 1-2, 1-7 (2011).

The author tries to answer the following questions: To what extent can diagrams and figures be used in presenting certain units concerning logic and elementary set theory? Do “proofs” based solely on diagrams can be treated as adequate?
