American special schools. I: Specialized high schools in New York City.

From the text: Eighth and ninth grade students who reside in New York City may apply to attend one of the city’s nine public specialized high schools. The Bronx High School of Science, Brooklyn Technical High School, and Stuyvesant High School are the best known of the schools that focus on mathematics, science, and technology. Acceptance is based exclusively on the Specialized High School Admission Test. A 1971 New York State law was passed to assure the continued existence of the specialized schools and admission by examination.
