

ZMATH 2013d.00555

Gorina, L. A.

On the developmental potential of the graph of a function in a course of algebra in basic school. (O razvivajushchem potentsiale funktsional'no-graficheskoy linii v kurse algebry osnovnoj shkoly.)

Mat. Shk., No. 2, 69-73 (2011).

Basing on the priority of the graph of a function in constructing a course of algebra in elementary school five well-known principles of developmental education, developed by L. V. Zanov can be realized in the most optimal form.
