Zhou, Yunming

The review of Euclidean geometry and the multi-purpose graphics.

Far East J. Math. Educ. 7, No. 2, 157-162 (2011).

Summary: In this paper, from a basic graphics, a group of extended transformations of the Euclidean geometry of different types of equations and the proofs are given. These play an important role in the study, review and effective remember of Euclidean geometry, to play to win with fewer, a multiplier effect.

Classification: G40 G60

Keywords: Euclidean geometry; transformations; orthocenters; side centers
