

ZMATH 2012f.00431

Uhrinová, Eva

Using games in teaching mathematics. (Učme matematiku pomocou hry.)

Šedivý, Ondrej (ed.) et al., Zborník vedeckých príspevkov z IX. nitrianskej matematickej konferencie. Nitra: Constantine The Philosopher University in Nitra, Faculty of Natural Sciences (ISBN 978-80-8094-958-7). *Prírodovedec* 476, 221-224 (2011).

In this contribution, we emphasize the importance of games as an appropriate teaching method in mathematics. The knowledge that pupils achieve through games remains longer in memory and does not have a formal character. The contribution discusses the game ‘NIM candy’ which we used on the scientific fair, organized by the Faculty of Natural Sciences of Constantine the Philosopher University in Nitra in the shopping centre Mlyny. *Ján Šunderlík (Nitra)*

Classification: D44 U64 A24

Keywords: games; teaching methods
