Methodology of geometrical construction tasks in DGS' environment. (Metodika konštrukčných úloh z geometrie v prostredí DGS.)

Acta Math. Nitriensia 2, No. 1, 13-18 (2016).

Summary: In this article we deal with some methodological teaching problems that are occurring in teaching to geometric construction tasks. The analysis of problems are related to support of teaching with usage of dynamical geometry software in generally.

Classification: G40 G80 U70

Keywords: dynamical geometry software; geometry; didactics of mathematics
