

ZMATH 2011d.00396

O'Brien, Thomas C.; Wallach, Chris; Mash-Duncan, Carla

Problem-based learning in mathematics.

Mont. Math. Enthus. 8, No. 1-2, 147-160 (2011).

Summary: The results of the authors' work where children collaboratively constructed important ideas in the face of problem solving are consistent with the constructivist notion that moderate conflict leading to provoked adaptation is at the heart of learning. Examples are given for grade 1 and grade 4 classes.

Classification: D42 C72

Keywords: problem-based learning; primary education; teaching-learning processes
