**Geometric ideas of future teachers for pre-primary and primary education. (Geometrické predstavy budúcich učiteľ'ov pre predprimárne a primárne vzdelávanie.)**

Stud. Sci. Fac. Paedagog. 15, No. 4, 65-69 (2016).

Summary: Geometry is a part of mathematics education at all school levels. Geometric ideas already begin to be formed at the pre-school age of children. The accuracy and precision of these ideas are especially influenced by teachers. The article deals with the quality of geometric knowledge and skills of future teachers at the start of their university study.

*Classification:* G10

*Keywords:* geometry; future elementary teacher; pre-school education; elementary education
