**Logic in action. An open logic courseware project.**

Blackburn, Patrick (ed.) et al., Tools for teaching logic. Third international congress, TICTTL 2011, Salamanca, Spain, June 1–4, 2011. Proceedings. Berlin: Springer (ISBN 978-3-642-21349-6/pbk). Lecture Notes in Computer Science 6680. Lecture Notes in Artificial Intelligence, 141-153 (2011).

Summary: Today, logic is taught to a much broader academic audience than just the traditional target group of mathematicians and philosophers. Logic in Action provides modern open courseware, in the form of a freely accessible animated e-book, as an extensive teaching tool for this growing student population. The project stresses the methodological merits of logic for a wide range of interdisciplinary sciences.
