Movies in math classes. (Filmpjes in een wiskundeles.)
Uitwiskeling 26, No. 2, 8-33 (2010).

Summary: The 25th anniversary of Uitwiskeling was celebrated with movies. There was a movie competition in 2009 and we ourselves also made an attempt to produce some movies. There are some short films that pose a problem, others that explain some concept or show an application. There are also films that can inspire other teachers to do some experiments in math classes.

Classification: U80
Keywords: audiovisual media
