

ZMATH 2011c.00086

Schattschneider, Doris

The mathematical side of M.C. Escher.

Notices Am. Math. Soc. 57, No. 6, 706-718 (2010).

Much has been written about the mathematical aspects of M.C. Escher's work; see in particular *B. de Smit* and *H.W. Lenstra, jun.* [Notices Am. Math. Soc. 50, No. 4, 446–457 (2003; Zbl 1159.01353)]. This well written article has something to offer even for those who are familiar with Escher's mathematical side: details about Escher's life, and his interactions with mathematicians such as Penrose and Coxeter.

Franz Lemmermeyer (Jagstzell)

Classification: A30 M80

Keywords: Escher; tilings; symmetry
