On the Galilean non-invariance of classical electromagnetism.

Eur. J. Phys. 30, No. 2, 381-391 (2009).

The authors “pedagogically” show how a proof of the Galilean non-invariance of classical electromagnetism can be obtained, resting on simple pre-relativistic considerations alone. *Agneta Balint (Timișoara)*

Classification: M55

Keywords: Galilean non-invariance; Maxwell’s equations; classical electromagnetism
