

ZMATH 2009e.00416

Lassak, Marshall

Using dynamic graphs to reveal student reasoning.

Int. J. Math. Educ. Sci. Technol. 40, No. 5, 690-696 (2009).

Summary: Using dynamic graphs, future secondary mathematics teachers were able to represent and communicate their understanding of a brief mathematical investigation in a way that a symbolic proof of the problem could not. Four different student work samples are discussed.
