

ZMATH 2011e.00055

Español González, Luis

The complex synthetic geometry in the early work of Julio Rey Pastor.

Rev. Acad. Colomb. Cienc. Exactas, Fis. Nat. 32, No. 124, 381-402 (2008).

The author is a recognized expert in the figure of Julio Rey Pastor (1888-1962), a Spanish mathematician. This paper is dedicated to the analysis of the book *Fundamentos de la geometría proyectiva superior* (1916) by Rey Pastor, which develops the synthetic complex geometry. The influence of this book has been small.
