

ZMATH 2010e.00067

Hoare, G.

Leonhard Euler (1707-1783).

Math. Gaz. 91, No. 522, 406-414 (2007).

Euler is characterized as the most prolific mathematician of all time and one of the greatest masters of the mathematical arts. His life is described: he spent much time in St Petersburg, interspersed by a long period in Berlin. Some of the mathematics he developed, as well as the symbols he used are described.
