

ZMATH 2009a.00140

Zhao, Yong

Increasing math and science achievement: the best and worst of the East and West.

Phi Delta Kappan 87, No. 3, 219-222 (2005).

Summary: The East Asian countries are known for their high scores on international comparisons of math and science achievement. This does not necessarily mean, the author cautions, that the U.S. should rush to adopt their practices and abandon its own strengths.

Classification: D10 D30

Keywords: East Asia; USA; comparative studies; achievement
