**Promoting problem solving across geometry and algebra by using technology.**

Math. Teach. (Reston) 98, No. 9, 599-603 (2005).

Summary: Technology is a powerful tool in assisting students in problem solving by allowing for multiple representations. The vignette offered in this article provides insight into ways to solve open-ended problems using multiple technologies.

*Classification:* D50

*Keywords:* problem-solving strategies; open-ended problems; geometry; algebra
