

ZMATH 2006e.02758

Wang, Shu-qin

Statistics and analysis of the attribution in mathematics learning.

J. Math. Educ. (Tianjin) 14, No. 1, 66-67 (2005).

The author studied the attribution in mathematics learning from two different aspects. He observed that there are differences between teachers and excellent students in this attribution, and there are varying differences between teachers and low achievement students. He also investigated the influence of family and living circumstances factors.

Classification: C30 C60

Keywords: learning; attribution
