Schiffman, Jay L.; Simons, Christopher S.

More odd abundant sequences.

Math. Spectr. 38, No. 1, 7-8 (2005).

The arithmetic sequences $945 + 630n$, $3465 + 2310n$ yield odd abundant numbers for each of the initial 52 resp. 193 number inputs. In the article an infinite family of such sequences is described.

Classification: F60

Keywords: number theory; abundant numbers
