Plasencia Cruz, Inés

Some reflections on mathematics and its teaching and learning in primary school. (Consideraciones sobre la matemática y su enseñanza y aprendizaje en la Educación Primaria.)

Form. Profr. Investig. Educ. Mat. 6, 277-299 (2004).

In this paper I will make some reflections about the role of mathematics in primary school curriculum, mainly in Canary Islands community. Together with the official dispositions which regulate the curriculum, I will make use of some suggestions made by the Consejo Escolar de Canarias and established in the document Plan de Objetivos y Contenidos Prioritarios para la Educación Primaria.
