

ZMATH 2015f.00351

Rackham, Caroline; Poote, Denise

Collisions: mathematics and art.

Prim. Math. 19, No. 2, 14-15 (2015).

From the text: Our project looked into ways that art can help to teach mathematics in schools. It was undertaken by Wave Ares Educacion Agency, as a pilot study and involved the artist Denise Poote. She worked with schools on two mathematical subject areas on activities which tackled language-based mathematics questions and also visual mathematics.

Classification: D33 C53 M83

Keywords: visual mathematics; language-based mathematics question; mathematics and art
