

ZMATH 2005e.02412

He, Tian-Xiao; Sinkala, Zachariah; Zha, Xiaoya

If $F(x) = \int_x^{2x} f(t) dt$ is constant, must $f(t) = c/t$?

Coll. Math. J. 36, No. 3, 199-204 (2005).

There are examples showing that the answer is "no".

Classification: I55
