

ZMATH 2015e.00847

Farnsworth, David L.

Identical twins raised apart.

Teach. Stat. 37, No. 1, 1-6 (2015).

Summary: This article describes a bivariate data set that is interesting to students. Indeed, this particular data set, which involves twins and IQ, has sparked more student interest than any other set that I have presented. Specific uses of the data set are presented.

Classification: K80

Keywords: teaching; simple linear regression; classroom activity; variable selection
