Cramer, Katharina; Kamps, Udo

Interactive graphics for elementary statistical education.

Institut International de Statistique. 54ème session. Communications libres. Livraison 1. ., 222-223 (2003).

Summary: Within the 'New Media in Education Funding Programme' the German Federal Ministry of Education and Research (bmb+f) supports the project 'e-stat' (project period April 2001 - March 2004) in developing and providing a multimedia, web-based, and interactive learning and teaching environment in applied statistics called EMILeA-stat. The structure of EMILeA-stat, its scope and objectives are sketched. The talk includes an insight into the system with a focus on interactive visualizations.
