**EMILeA-stat: A web-based learning environment in applied statistics with a focus on learning and teaching in secondary schools.**

Statistics education and the Internet. ., 9 p. (2003).

Within the 'New Media in Education Funding Programme' the German Federal Ministry of Education and Research (bmb+f) supports the project 'e-stat' to develop and provide a multimedia, web-based, and interactive learning and teaching environment in applied statistics called EMILeA-stat. The structure of EMILeA-stat, its scope and objectives are sketched focussing on its use in teaching and learning statistics in secondary schools. Related contents, interactive visualizations, and didactical aspects are presented.
