**Teaching mathematics using the Internet.**

Bragg, Leicha et al., MERGA 26: Mathematics Education Research: Innovation, Networking, Opportunity (MERINO). Vol. 1 and 2. ,. 492-498 (2003).

This paper examines teachers' use of the Internet in the teaching and learning of Mathematics. The study draws upon data collected via an online survey and interviews with six teachers. It reports on their beliefs, strategies for use and their perceptions on how it impacts on students and their learning of mathematics. Some comparisons are made between the ways teachers used the Internet.
