Management, motivation and student-centered instruction I: Analytical framework.

PRIMUS, Probl. Resour. Issues Math. Undergrad. Stud. 13, No. 2, 97-123 (2003).

We describe a research-based analytical framework (MALA, for motivation, activity, learning and attribution) for the examination of classroom management issues in student-centered instruction. We review research in classroom management for university and college-level classrooms and describe the research base for the MALA framework. (authors' abstract) (orig.)
